Happy New Year!

For the last ten years of being a Board Certified Periodontist and twelve years prior to my specialty, I have owned a successful private general practice and am now expanding my services. My goal is always to stay current on the latest technologies and maintain the best care matched with the best quality materials available. I would like to introduce myself and the following services to you.

As a member of the IAOMT (International Academy of Medical Toxicology), I am keenly aware that many patients may be metal sensitive and would like an alternative to metal dental implants. Now, there is a way. We have been placing non-metal implants of zirconia in our practice for the last 3 years successfully.

Laser procedures are completed in our office, often painlessly. Teeth Desensitization, Bio-Stimulation Treatments, Tooth Contouring, and

Dental Implants-metal & metal-free
